Summary

June 2019 - Present

- Senior MarTech Developer with 6 years of experience implementing marketing technology solutions. Expert in leveraging cloud platforms (Azure, AWS) and digital marketing knowledge to solve complex client business challenges.
- Developed proof of concept for Acxiom's identity services working within Adobe's Real-Time Customer Data Platform (AEP). Engineered dynamic web solutions in multiple tech stacks for Acxiom with modern front-end and back-end technologies (Node/Express, React, .NET, Streamlit, Jira, Git).
- Consulted through Accenture with a large US bank and a global pharmaceutical manufacturing company to migrate data centers and ensure successful change of network devices.

Experiences

Acxiom IPG - Senior MarTech Consultant

November 2021 - Present

- Served as a strategic liaison between sales, marketing, and technical teams, tailoring Adobe Experience Platform environments for client success through hands-on training, problem resolution, and best practice guidance. Ad hoc requests included debugging segment activation, batch ingestion, sandbox admin issues, and validating workflow automations.
- Rolled out Acxiom's first Sitecore and Treasure Data customer data platforms. The CDPs combine web data using google tag manager / GA4 with Acxiom's data identity tools to personalize user experience and activate Marketo across brands.
- Led the AI initiative to create an Azure PromptFlow tool for automating web demo testing and evaluation of Large Language Model workflows with real-time prompt variation and metrics.
- Denormalized datasets into Adobe Experience Platform's NoSQL models, effectively addressing identity stitching issues to maintain a unified and accurate customer view.
- Built full stack React & Streamlit web applications that replicated Acxiom's data identity expertise within demo CDP & Snowflake data clean room environments. These dynamic demos were supported by API integrations, AWS API Gateway, and S3, using lambdas / serverless for ETL operations.
- Customized server-side javascript application to deliver data from Acxiom's Real-Time Identity platform for clients' identity management & marketing issues. Worked in weekly sprints utilizing CI/CD tools, Postman, NoSQL DBs, and unit / mutant testing. Leveraged Cloudwatch and log-insights to diagnose platform issues.

Accenture - Cloud & Networking Consultant

June 2019 - January 2021

Global Pharmaceutical Manufacturer - Network Delivery Lead

- Lead project manager for network device configurations. Designed MS Project resource plans across all project phases, ensuring smooth execution of organizational change initiatives and requirements gathering.
- Oversaw end-to-end network infrastructure upgrades for mission-critical client sites, delivering seamless transitions with no unplanned downtime. Assignments included updating Infoblox DNS nodes, installing WLAN devices, servers, and circuits.

Large U.S. Banking Corporation - Project & Operations Manager

- Guided client's enterprise applications through a company-wide merger & data center migration.
- Architected comprehensive cloud migration frameworks, streamlining transition processes and enhancing scalability for critical applications.
- Coordinated teams onsite to complete backlog of infrastructure build tasks.

AMG Corporate Enterprise Inc. - Network Infrastructure Consultant

January 2021 - October 2021

- Supported application team in migration and development of legacy applications to AWS environment.
- Created initial build assessment that detailed infrastructure needs and base cost assessment.
- Developed work plans, and was responsible for tracking / reporting progress to leadership.
- Prepared detailed status reports and presented regular updates to stakeholders and executive leadership.

Certifications

- Adobe Real-Time CDP Developer Expert
- Sitecore CDP & Sitecore 10 .NET Developer
- Treasure Data CDP for Data Management
